

BDAD
Project Contribution

TEAM H:

Akshay Saxena (BDA 01)

Divij Bhutani (BDA 02)

Chandan Kamal (BDA 03)

Akshay(BDA 01): Worked on colab notebook to scrap twitter data using spark and python code. Worked on to filter the data and store it in data frame using keywords and convert that data frame into csv file. Also worked on to design the database columns.

Divij(BDA 02): Worked on colab notebook to scrap twitter data using spark and python code. Worked on to design the database columns, worked on neo4j to build a graph database by designing queries for it. Also worked on to plot the knowledge graph using neo4j.

Chandan(BDA 03): Worked on colab notebook to scrap twitter data using spark and python code. Worked on to design the database columns. Also helped akshay filter data using keywords. Currently trying to implement a simple GUI for front end.
